SUMMARY

Computer Science and Engineering graduate specializing in Artificial Intelligence and Machine Learning with hands-on experience developing AI-native applications, agentic workflows, Retrieval-Augmented Generation (RAG) systems, and scalable full-stack applications. Proficient in Python, JavaScript, React, React Native, FastAPI, LangChain, LangGraph, SQL, Docker, REST APIs, Git, Google Cloud Platform, and LLM technologies. Experienced in building production-ready AI solutions, scalable backend services, and cloud-integrated applications using Agile, SDLC, and CI/CD best practices, with a strong focus on API development, prompt engineering, embeddings, performance optimization, and software reliability.

SKILLS

- **Programming & Web Development:** Python, Django, HTML, CSS, React.js, JavaScript, FastAPI, REST APIs, API Integration, Data Structure & Algorithms, Object-Oriented programming (OOPs)
- **Databases & Cloud:** SQL, Google Cloud Platform(GCP), Vector Databases, FAISS, BM25 (Hybrid Search)
- **AI & Machine Learning:** AI, Machine Learning, Machine Learning Algorithms, NLP, LLMs, RAG, Pandas, NumPy, PyTorch, TensorFlow, LangChain, LangGraph, Ollama, AI Agent, Generative AI, Prompt Engineering
- **Tools & MLOps:** Git, Visual Studio Code, Google Colab, Jupyter Notebook, Streamlit, Docker, CI/CD pipelines, Agile Methodologies, Debugging, Unit Testing, Software Development Life Cycle (SDLC), AI Automation, AI Coding Tools
- **Soft Skills:** Teamwork And Collaboration, Self Motivation, Adaptability And Flexibility, Time Management, Analytical Thinking

WORK EXPERIENCE

CYPWNG Software Technologies

Mar 2025 - Sep 2025

Software Developer (AI Specialist) Intern

Hyderabad, Telangana

- Developed AI-native applications and agentic workflows using Python, FastAPI, LangChain, and LangGraph, enabling multi-step reasoning, context-aware processing, workflow automation, and LLM-powered agents with tool usage, memory management, and API connectivity for document intelligence and business automation.
- Built and optimized Retrieval-Augmented Generation (RAG) pipelines using FAISS, embeddings, and hybrid search, improving document retrieval accuracy and response relevance across enterprise datasets while optimizing prompts, debugging performance bottlenecks, and enhancing application reliability and response latency.
- Designed and developed scalable RESTful APIs and backend services using FastAPI, ensuring secure integration between AI systems, enterprise applications, and retrieval platforms, while containerizing and deploying AI services with Docker to improve environment consistency, deployment reliability, and operational scalability.
- Collaborated in Agile development environments using Git-based workflows, contributing to code management, debugging, performance optimization, deployment, and continuous improvement of AI-driven applications and enterprise workflows.

Tanvox Technologies Pvt. Ltd

Feb 2026 - Aug 2026

Full Stack Developer Intern

Hyderabad, Telangana

<https://play.google.com/store/apps/details?id=in.rennto.app>

- Developed production-ready cross-platform applications using React, React Native, Django, Python, REST APIs, SQL, Git, and Docker, delivering scalable, responsive, and maintainable software solutions.
- Designed reusable frontend components, backend services, API integrations, and data management solutions while optimizing database performance and improving application reliability.
- Participated in Agile software development processes including requirement analysis, feature implementation, software testing, debugging, code reviews, and deployment activities using Git workflows.
- Supported complete application lifecycle activities including development, deployment, configuration, maintenance, issue resolution, and continuous improvement while following software engineering best practices.

PROJECTS

AI Memory Agent <https://github.com/RohitHubs/AI-Agent.git>

- Built a memory-enabled AI assistant using Python, FastAPI, LangChain, and Gemini API, maintaining contextual conversations across multiple user interactions.
- Implemented conversational memory, prompt engineering, and tool-calling workflows to improve response consistency and multi-step task execution.
- Containerized the application using Docker and developed evaluation mechanisms to enhance reliability, scalability, and production readiness

Multi-Agent Document Intelligence System <https://agentragassistant.streamlit.app/>

- Developed a multi-agent document intelligence platform using LangGraph, LangChain, Python, and LLMs for document analysis, information retrieval, and knowledge extraction.
- Implemented hybrid retrieval using FAISS, BM25, embeddings, and RAG architecture, improving search relevance and contextual understanding across large document repositories.
- Designed agent orchestration workflows with context and state management, enabling coordinated multi-agent reasoning and scalable backend operations through Docker deployment

EDUCATION

Sphoorthy Engineering College, JNTUH

Sep 2023 - Apr 2026

B.Tech, Artificial Intelligence and Machine Learning

Hyderabad, India

CERTIFICATIONS

- Introduction to Machine Learning: Infosys, Dec 2023
- Introduction Artificial Intelligence: Great Learning, Mar 2024
- Python Coder: Kaggle, Sep 2024
